CENTRAL GOVERNMENT OF HOKORIA

The State of Hokoria has concluded its investigation into the 'Republic of Polartica'.

Conclusions

- The State of Hokoria believes with a degree of high certainty, based on an identification strategy that has been largely successful in the past, that the Republic of Polartica is part of an Empire of Som operation to spy on and gain information about the State of Hokoria.
- This type of attack has been attempted before by the Empire of Som, under the names 'Tristan Republic' and 'Kingdom of Westspillen'.
- The operative goes by the name or alias of 'Sergej I', the same name used by the Empire of Som's 'Khan of the Volga'.
- They also claimed that "some catfish [people] are [threatening] me", claiming that the Empire of Som banned them for having associations to the State of Hokoria and being hostile towards them.

Advisory

- All allies should blacklist the Republic of Polartica from any Discord servers due to the security risk that they pose.
- All allies should cut relations with the Republic of Polartica.

Other information

- Elias Oberholtz, a close ally of the State of Hokoria had previous suspicions about the individual's relations to the Empire of Som.
- They are currently in the Discord servers of 'MicroWiki@Discord', 'Kingdom of Salanda', 'Ikerlandia' and 'Nova Roma' having been removed from the 'Oniyan-Forestrian Empire' and 'WeAreHokoria' by Hokorian officials executing their issued powers.
